POPCoRN (Pediatric Overflow Planning Contingency Response Network)

Barrett Burger, MD
PGY-2 Internal Medicine/Pediatrics
BBURGER@uams.edu

- Medical, pediatric and emergency-medicine trainees and attendings from Boston Children's, Indiana, Ohio State, MGH, Cincinnati, Baylor, NIH, UChicago, Duke, and Penn State. We've been working over the last 2 months to provide guidance to children's hospitals urgently taking care of adults due to the COVID-19 pandemic.

- 47 peer-reviewed "one-pager" articles to date on the care of the most common adult conditions, and served as primary author on the guides for acute care of COVID-19, infective endocarditis, and acute and chronic cytopenias.

- These guides have been viewed 54,581 times, with 11% of views from New York City, where our work has been used as curriculum for pediatric providers in the NYU system.

- We've hosting a series of webinars (https://www.popcornetwork.org/webinars); including a webinar co-hosted with the American Academy of Pediatrics on April 30.

- Members of our team contributed to a recent publication in Pediatric Critical Care Medicine (https://journals.lww.com/pccmjournal/Abstract/9000/Caring_for_Critically_Ill_Adults_With_Coronavirus.98048.aspx). Editorials and commentary have been requested from the Academic Pediatrics Journal and AAMC.

- For more info, our website is https://www.popcornetwork.org/. Those interested in becoming involved can reach out there or at @POPCoRNnetwork on Twitter or Instagram, or at POPCoRN Network on Facebook. We also have additional resources for children's hospitals there, including our recommended admissions/discharge/transfer guidelines, virtual PICU/MICU/ED consult, and regional contacts.
